

Serial No.: 09/469,499

Response to Office Action Mailed December 23, 2004

**Amendments To The Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

1-47 (Cancelled).

- 1        48 (Previously Presented). A reproduction protection method for operating on  
2 main data which are conveyed by a data medium, the method comprising the steps of:  
3            detecting medium protection data which are specific to each of predetermined  
4 data pieces within said main data and are also conveyed by said data medium;  
5            detecting protection position information which specifies a position of said  
6 predetermined data pieces within said main data at which to apply reproduction  
7 protection, said protection position information also being conveyed by said data  
8 medium;  
9            assigning a medium protection level in units of video signal frames, based  
10 upon said medium protection data;  
11            limiting reproduction of said main data based upon at least a film classification  
12 system;  
13            generating apparatus protection data which comprise at least first apparatus  
14 protection data and second apparatus protection data,  
15            wherein said first apparatus protection data are specific to a region or country  
16 in which said main data are to be reproduced and can not be modified by a recipient

Serial No.: 09/469,499

Response to Office Action Mailed December 23, 2004

17 of said reproduced main data, and wherein said second apparatus protection data can  
18 be modified by said recipient to selectively define a plurality of protection levels  
19 including at least two levels which are respectively specific to adults and to children;  
20 defining a protection level based on said medium protection data and said  
21 apparatus protection data in combination; and  
22 executing reproduction of said main data in accordance with said protection  
23 level,

24 wherein the combination of said medium protection data and said first  
25 apparatus protection data determines whether said main data are reproduced in their  
26 entirety or not at all, and the combination of said medium protection data and said  
27 second apparatus protection data determines whether said main data are reproduced in  
28 their entirety, partially, or not at all.

1 2 (Currently Amended). A data medium for transferring main data to a  
2 reproduction apparatus for reproduction by said reproduction apparatus, characterized  
3 in that:

4 said data medium also transfers medium protection data which are respectively  
5 specific to each of predetermined data pieces within said main data and are also  
6 conveyed by said data medium;

7 said data medium also transfers protection position information which specifies  
8 a position of said predetermined data pieces within said main data at which to apply

Response to Office Action Mailed December 23, 2004

9 [[said]] reproduction protection, said protection position information also being  
10 conveyed by said data medium;

11 said medium protection data assigns a medium protection level in units of  
12 video signal frames;

13 the reproduction apparatus generates apparatus protection data which comprise  
14 at least first apparatus protection data and second apparatus protection data,

15 wherein said first apparatus protection data are specific to a region or country  
16 in which the reproduction apparatus is to be used, and

17 said first apparatus protection data can not be modified by a user of the  
18 reproduction apparatus; and

19 said second apparatus protection data can be modified by the user to selectively  
20 define a plurality of protection levels including at least two levels which are  
21 respectively specific to adults and to children, and

22 said medium protection data and said apparatus protection data in combination  
23 specify a degree of restriction on said reproduction of the main data by said  
24 reproduction apparatus,

25 wherein the combination of said medium protection data and said first  
26 apparatus protection data specifies that said main data are reproduced in their entirety  
27 or not at all, and the combination of said medium protection data and said second  
28 apparatus protection data specifies that said main data are reproduced in their entirety,  
29 partially, or not at all.
